Experience

Kaye MacKenzie

Intern Software Engineer

March 2025 – Present

Manchester, United Kingdom

- Contributed to **two major production projects**, including a full-scale online EdTech platform and a cross-platform mobile and web application, contributing across frontend and backend systems.
- Developed scalable features, optimized APIs, and improved database performance, resulting in 30% reduction in operational costs with zero impact on load times.
- Delivered production-ready updates in collaboration with product and design teams, enhancing reliability, performance, and overall user experience across platforms.

Projects

Recello – Marketplace Application | React Native (Expo), TypeScript, Supabase, Tailwind (NativeWind)

- Built a mobile marketplace for buying and selling smartphones using **Expo Router**, **React Native**, and **TypeScript**, including onboarding flows, authentication, home feed, search, saved items, and detailed listing views.
- Implemented listing creation and management with **multi-image upload**, client-side **image compression**, and responsive **image gallery** components for smooth browsing.
- Architected a modular UI system using **NativeWind** (Tailwind for React Native), reusable **design system components**, and **theme-aware** layouts to ensure consistency and scalability.
- Integrated **Supabase** for authentication, persistent storage, and real-time messaging, leveraging **Row Level Security (RLS)** policies and typed **PostgREST** APIs for secure data access.

FATTYS-Commerce Application | React Native (Expo), Supabase, PostgreSQL

- Built a mobile-first e-commerce app using **React Native Expo**, **Supabase**, and a reusable **component-based UI** for product browsing, cart, wishlist, and profiles.
- Implemented an advanced product gallery with **WebP image optimization**, **responsive loading**, and **touch gestures** (swipe and zoom) for smooth mobile UX.
- Developed **variant-aware cart** flows with **real-time inventory tracking** and **session-based carts** for both guest and authenticated users.
- Integrated secure auth and profiles with **Supabase Auth**, **Row Level Security (RLS)**, and **database triggers** for automatic profile management.

Nuch Summarizer – AI Text & Audio Summaries | Next.js, TypeScript, Supabase, OpenAI

- Built a modern AI-powered web app for summarizing text and audio content using **Next.js 14**, **TypeScript**, and **Tailwind CSS**, including flows for new summaries, history, settings, and auth-gated dashboards.
- Implemented flexible summarization pipelines that support **extractive** and **abstractive** modes, configurable summary length, and both **concise**, **bullet-point**, and **comprehensive** outputs via the **OpenAI ChatGPT API**.
- Developed audio ingestion and processing features using **OpenAI Whisper** for transcription, enabling uploads and in-browser recording of formats like MP3/WAV/M4A with automatic transcription-to-summary workflows.
- Integrated **Supabase** for authentication and persistent storage, including protected routes, session-aware layouts, and per-user summary history, with a responsive, animation-rich UI powered by **Framer Motion**.

Education

University of East London

Bachelor of Applied Computing

Sept 2024 - Jun 2025

- Relevant Coursework:** Enterprise Architecture and Cloud Computing (CN6000), Computer and Network Security (CN6003), Project Management (CN6004)

Fast National University of Computer and Emerging Sciences

Bachelor of Artificial Intelligence

July 2021 - Jun 2024

- Relevant Coursework:** Artificial Intelligence (AI2002), Machine Learning (AI3002), Operating Systems (CS2006), Probability and Statistics (MT2005), Fundamentals of Software Engineering (CS2004)

Fast National University of Computer and Emerging Sciences

Bachelor of Computer Sciences

Sept 2020 - Jun 2021

- Relevant Coursework:** Programming Fundamentals (CS1002), Object Oriented Programming (CS1004), Data Structures (CS2001), Database Systems (CS2005), Computer Networks (CS3001)

Technical Skills

Programming Languages: JavaScript, TypeScript, Ruby, SQL, C++, Python

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Redux

Backend: Node.js, WebSockets, Supabase, Auth, Express.js, Ruby on Rails, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Database Indexing, Firebase

DevOps / Tools: Git, Docker, Azure, CI/CD, Postman, Nginx

AI / Machine Learning: Pandas, NumPy, Model Evaluation & Feature Engineering, Image-Based AI Workflows (Inference Pipelines), AI-Powered Recommendation Systems

Analytics / Integrations: Matplotlib, Google Analytics, FullStory, Leadfeeder, DocuSign

Design / Misc: Figma, Wireframing
