Muhammad Ibrahim Tariq

Student at University of East London

London, England, United Kingdom

Summary

Aspiring Computer Scientist | Applied Computing Student at University of East London | Passionate about AI, Data Science, and Software Development

Currently pursuing a Bachelor's degree in Applied Computing at the University of East London, I have a diverse academic and work background, including previous studies in Artificial Intelligence and Computer Science. I bring hands-on experience in programming languages (Python, Java, C++), and web technologies like HTML, CSS, and JavaScript.

With experience managing teams and handling data in real-world, I'm eager to apply my skills in innovative, impactful projects. I'm always keen on learning new technologies and contributing to problem-solving efforts. Looking forward to connecting with like-minded individuals and exploring opportunities to grow and contribute in the tech industry!

Experience

Kaye MacKenzie

Junior Software Engineer

June 2025 - November 2025 (6 months)

Manchester

- Contributed to full-stack development for both mobile applications and the company website using Expo and React Native.
- Implemented responsive frontend components and optimized API integration for enhanced user interactions.

CDRS Comprehensive Disaster Response Services

Team Manager

January 2020 - September 2020 (9 months)

I managed and coordinated disaster response activities, oversaw resource distribution to affected areas, recruited and supervised volunteers, organized transportation and delivery of aid, worked with local communities to assess needs, and prepared reports on activities and outcomes.

M Care Lab

Data Entry Operator

July 2017 - September 2018 (1 year 3 months)

Islāmābād, Pakistan

Efficiently managed data entry tasks, ensuring accurate input of patient information, medical records, and clinic documentation into the system. Maintained confidentiality and adhered to data protection standards. Streamlined administrative processes by organizing and updating files, resulting in improved operational efficiency.
